

How To Change Name Servers at NameCheap.com

Once you have registered a domain name at NameCheap.com you will need to enter/change the Name Server Addresses for your new Hosting account.

It's easily done:

- Log into your NameCheap account and you will be taken to your Home Page

- Click "View" on the line "Number of domains in your account"

- Click on the domain name you wish to assign the server names to

- On the left-hand menu, the second item will be similar to this:

"TRANSFER DNS TO WEBHOST" - click on that

- On the next page you will see boxes named - 1, 2, 3 etc to enter the information

Enter - ns1.usejoomla hosting.com - (IP address is 65.254.40.43) in Box 1

Enter - ns2.usejoomla hosting.com - (IP address is 65.254.40.43) in Box 2

(You do not need to enter the iP addresses, but they are provided here in case you are using another company who may require them)

- Click "Save Changes" and your new domain name will resolve to your new hosting account as soon as it is approved.
